REWIND TIME?

The rejuvenating effects of the **FOUR BIOMIMETIC PEPTIDES** built into the formulation of the **Perfect Code** range of facial products represent a new development in cosmetology and a worldwide innovation. The entire cosmetics sector agrees that the scientifically proven action and perfected formulation of different types of peptides is the most important cosmetological breakthrough of the **last quarter of a century**.

How do peptides work?

When applied to the skin, peptides send a signal to skin cells that tells them to begin intensive regeneration. In this way, skin and cell "damage" in the form of pronounced wrinkles begins to be reduced and more of the **key building blocks of skin** – collagen, elastin and hyaluronic acid – are produced. This accelerated synthesis is also evident in a **reduction in the number and prominence of wrinkles**.

PERFECT FORMULA

The **Perfect Code** range represents the perfect formula for the individual needs of **every skin** – biomimetic peptides will send a signal to exactly the right number of skin cells, telling them to begin intensive regeneration.
